LOUISVILLE DISTRICT

LOCK AND DAM 53 - NAVIGATION LANE CHANGE FOR DAM REPAIRS

OHIO RIVER MILE 962.6

Notice is given that the Louisville District - Army Corps of Engineers, via contract, will be making repairs to the dam throughout the remaining 2015 construction season. Depending on river conditions, repairs will be made both with the dam wickets up and with the wickets down. The contractor will be on site beginning August 17, 2015 and will be available to make repairs from then on as needed, dependent upon Ohio River elevations. (Less than 19.9' Upper Gage on L&D 53's upper gage)

Specific navigation lane changes will be laid out in conjunction with and coordinated with on-going work at Olmsted L&D (ORM 964.6). Lane changes resulting from work at LD 53 will be issued both by Broadcast Notice to Mariners (BNM) from the Olmsted office as well as through the official USACE Navigation Notice system, including channel chart graphics. The Olmsted assist vessel will aid in safe navigation through the entire working area extending from above L&D 53 to below Olmsted L&D.
